Last Updated Wednesday, 10 August 2022

Here lists some samples to have your attention during daily work, which helps you improve security awareness. ***They were sent from non-CEIBS addresses (highlighted IN RED). 1. Shared Files – A document link will be inserted to the email body. 2. Password Expiration – Normally a highlight button on the email body 3. Account Expiration – The account would expire unless you verify the password 4. System Maintenance – Require entering account info to finish the system upgrade 5. Fake Quarantine Email Notification – The RELEASE button leads you to a page that requires password 6. QR Code - Inserted into email body or attachment to lead user to scan and enter band card info Step1: Pretend to be the finance Dept. or government Dept. Step2: Click "I Ûe3†", it will enter the fake band card page Step 3: If you enter all these info and verification code, your balance would be transferred.
